ProSnap Lite

2025-Present

About

ProSnap Lite is a multi-tenant platform that turns documents into structured data using OCR and LLMs. It ships with a web portal and a mobile app. I led the backend: architecture, REST API, and the background processing system.

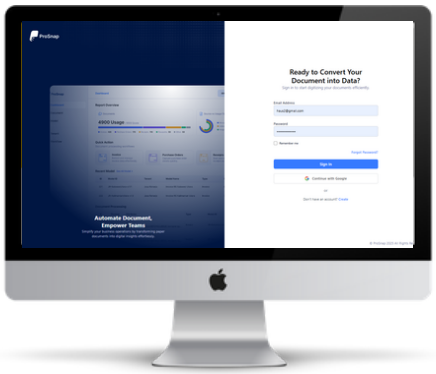

Technologies

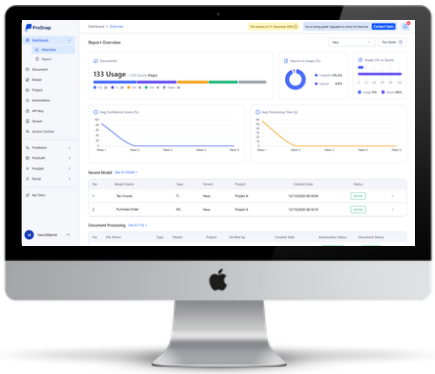

Blazor

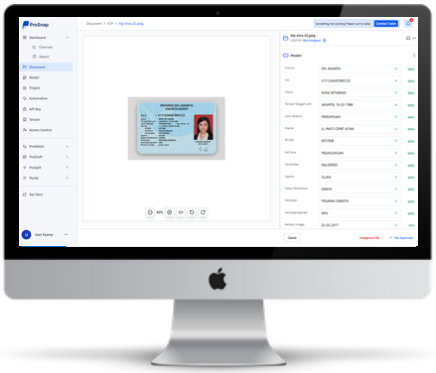

C# & .NET 10

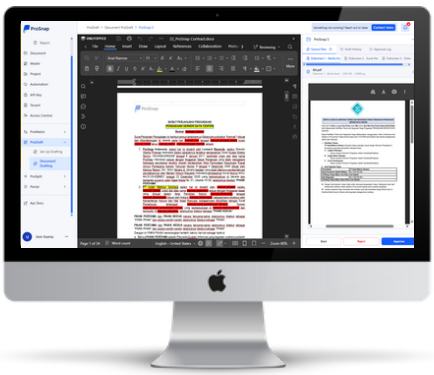

RabbitMQ

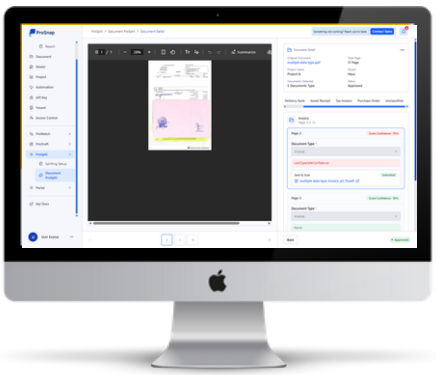

Postgre SQL

Features

- Multi-tenant ASP.NET Core API (JWT/Google auth, RBAC, API keys, database-per-tenant)
- RabbitMQ workers with retry, callbacks, quotas, and SignalR/Firebase notifications
- Document tools: ProSplit, ProMatch, ProDraft, Export Automation
- Local OCR (RapidOCR) and self-hosted LLM

Beacukai Form

2023-2024

About

Developed a Beacukai form within our ERP system that connect to CEISA 4.0 through API Integration. This empowers users to access and input data from our ERP platform, eliminating manual entry and enhancing overall workflow efficiency.

Technologies

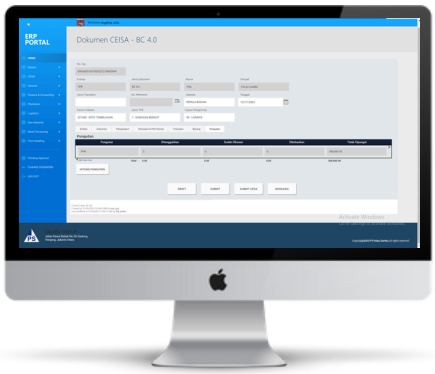

Nintex

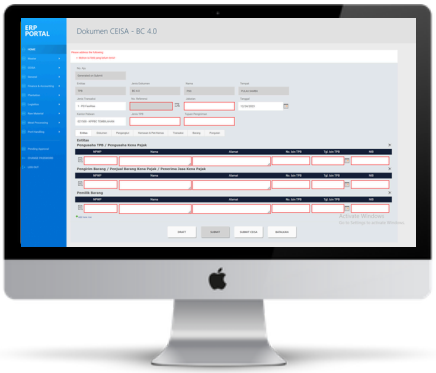

Javascript

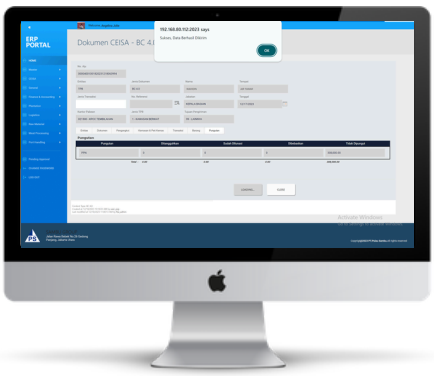

C# & .NET 4.5

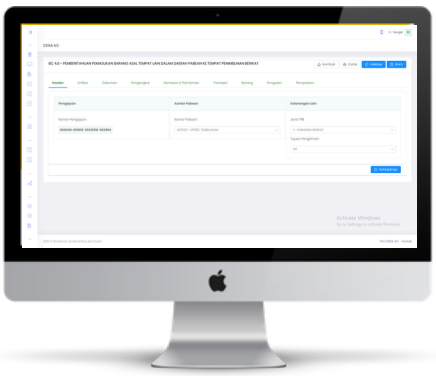

SQL Server

Features

- Integration to CEISA 4.0 using ASP.Net Web API.
- Popup lookup data and dropdown data using Javascript, JQuery, ASP.Net Web Service (ASMX) and ADOT.Net.
- Validation input same like validation in CEISA 4.0 (brutto, empty input, price, tax)
- Tax calulation per HS Number.
